PHILIPS TECHNICAL REVIEW

VOLUME 26
1965

PHILIPS TECHNICAL REVIEW

The Review is published by the Research Laboratories of N.V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands, and is devoted to the investigations, processes and products of the laboratories and factories of the Philips concern. In the articles the associated technical problems are treated along with their physical or chemical background. The Review covers a wide range of subjects, each article being intended not only for the specialist in the subject but also for the non-specialist reader with a general technical or scientific training.

The Review appears in four editions: English, Dutch, French and German, all identical in contents. There are twelve numbers per volume, each of about 32 pages. A yearly index is given for each volume and an index covering ten volumes appears every five years (the last was included in volume 25, 1963/64).

Editors: Ir. S. Gradstein, Editor-in-chief
Ir. D. van Dalen
Dr. E. Fischmann
Ir. J. M. van Hofweegen
Drs. J. W. Miltenburg
Dr. J. Ubbink

English edition : D. A. E. Roberts, B.Sc., A.Inst.P., (London)

French edition : H. Piraux (Paris)

German edition: Dipl.-Phys. R. M. K. Dockhorn (Hamburg)

Subject index, Volume 26, 1965

Page

Aachen, Philips laboratory at 89, 93
Air traffic control, computer for 226
Barium titanate semiconductors 119
Carrier telephony, modern systems for 206
Cathode with low thermal inertia (harp cathode) 309
Check characters, data checking with 156
Circuit block system, digital, for measuring and control equipment 164
Companders with a high degree of compression 215
Computers, recent developments in electronic . 67
Computers, development of peripheral equipment for 148
Crystal growth by chemical transport reactions 117
Data checking during input and transmission . 156
Data processing, peripheral equipment for . . 148
Dielectric transmission lines for mm waves . 342, 350
Diffractometer for single crystals "PAILRED" . 316
Digital circuit block system for measuring and control equipment 164
Digital generation of musical intervals 170
Doping of epitaxial Si (spark-doping) and Ge . 194
Electric motors, small 143
Electronic computers, recent developments in . . 67
Epitaxial Si and Ge, doping 194
Fluorine chemistry, possible applications of . . 111
Gallium phosphide light sources and photocells 136
Gas refrigerating machine for 20 °K and lower 1
Gas refrigerating machine, industrial, with hydraulic piston drive 297
Germanium-electrolyte interface investigation . 127
Hamburg, Philips laboratory at 89, 93
Harp cathode 309
History of telegraphy 268
Hydrogen, cryogenic production of ultra-pure . 27
Interface, investigation of germanium-electrolyte 127
Klystron multiplier for 0.8 mm waves 61
Laboratories of Philips in Germany: history, research programme 89, 93
Magnetic tape store with static read-out for telegraph exchanges 250
Millimetre waves, transmission lines for . . 342, 350
0.8 millimetre waves, generation of 61
Monitor for X-rays and gamma rays 190
Mortar made from SiC 340
Musical intervals, digital generation of 170

Page

Nitrogen in silicon iron 81
Oosterhuis, Dr. E., obituary 285
Opto-electronics: GaP light sources and photocells 136
"PAILRED", automatic single-crystal diffractometer 316
Phase theory, I, II 12, 52
"Plumbicon" with increased sensitivity to red light 49
Refrigerating machine for 20 °K and lower . . 1
Refrigerating machine, industrial, with hydraulic piston drive 297
Rolling diaphragm seals 287
Selective thermal radiators 33
Silicon carbide, crystal growth of (II) 187
Silicon carbide mortar 340
Silicon iron, nitrogen in 81
Sodium lamps, thermal insulation for 105
Solids, transport phenomena in 99
Stereophonic radio broadcasting, I. Systems and circuits 327
Sub-millimetre waves: generation of 0.8 mm waves 61
Surface-wave transmission lines for mm waves 342, 350
Telecommunication:
Modern carrier telephone systems 206
Companders with a high degree of compression 215
Electronic computer for air traffic control . . 226
Automatic telegraph exchanges with electronic stores 240
Magnetic tape store for telegraph characters . 250
TV transmitters for bands IV and V 256
History of telegraphy 268
Television camera tube ("Plumbicon") with increased sensitivity to red light 49
Television tape recorder 177
Television transmitters for bands IV and V . . . 256
Thermal radiators, selective 33
Transport phenomena in solids 99
Transport reactions, chemical 117
Verster, Prof. Dr. N. F., inaugural address . . . 321
Video tape recorder 177
Whiskers, SiC (II) 187
X-rays, sensitive monitor for 190

Author index, Volume 26, 1965

Page

Aa, H. H. M. van der, see Rietdijk, J. A.
Ammers, H. van and J. Hesselink
A sensitive monitor for X-rays and gamma rays 190
Andrich, E. and K. H. Härdtl
Investigations on $BaTiO_3$ semiconductors 119
Beukering, H. C. J. van, see Rietdijk, J. A.
Bruijning, H. G., see Goorissen, J.
Bruining, H. and S. Duinker
The research programme of the Philips laboratories in Germany 93
Dros, A. A.
An industrial gas refrigerating machine with hydraulic piston drive 297
Duinker, S., see Bruining, H.
Fast, J. D.
Nitrogen in silicon iron 81
Garratt, G. R. M.
The early history of telegraphy 268
Gerlach, H. G.
The harp cathode, a cathode with low thermal inertia for small transmitting valves 309
Gerwen, P. J. van, see Greefkes, J. A.
Gomes de Mesquita, A. H.
"PAILRED", an automatic single-crystal diffractometer 316
Goorissen, J. and H. G. Bruijning
Doping methods for the epitaxial growth of silicon and germanium layers 194
Gossel, D.
Generation of musical intervals by a digital method . . 170
Gossel, D., G. Kaps and W. Schott
A new system of digital circuit blocks for industrial measuring and control equipment 164
Greefkes, J. A., P. J. van Gerwen and F. de Jager
Companders with a high degree of compression of speech level variations 215
Grijseels, R. A.
An electronic computer for air traffic control 226
Grimmeiss, H. G., W. Kischio and H. Scholz
Gallium phosphide light sources and photocells 136
Groth, R. and E. Kauer
Thermal insulation of sodium lamps 105
Haan, E. F. de, F. M. Klaassen and P. P. M. Schampers
An experimental "Plumbicon" camera tube with increased sensitivity to red light 49
Haanstra, H. B. and W. F. Knippenberg
Crystal growth of silicon carbide (II) 187
Haas, G.
Problems and trends in the development of peripheral equipment for computers 148
Hansen, H. N.
Modern carrier telephone systems 206
Härdtl, K. H., see Andrich, E.
Harkema, P.
Automatic telegraph exchanges with electronic stores . . 240
Harten, H. U., R. Memming and G. Schwandt
Investigations on the germanium-electrolyte interface . . 127
Hesselink, J., see Ammers, H. van
Holst, G.
In memoriam Dr. E. Oosterhuis 285
Hurck, N. van, F. L. H. M. Stumpers and M. Weeda
Stereophonic radio broadcasting, I. Systems and circuits 327
Iperen, B. B. van and W. Kuypers
A klystron multiplier for generating 0.8 mm waves . . . 61
Jager, F. de, see Greefkes, J. A.
Kampen, H. van
Magnetic tape store for telegraph characters 250
